

Toilet Cleaning

Area	Washrooms both child and adult
Product	Toilet Cleaner
Tools to be used	5 litre bucket Red Cloth Toilet brush PPE (gloves, apron, goggles as required)
Dilution ratio	Undiluted as per manufacturers instructions
Water temp.	Cold
Procedure	<ol style="list-style-type: none"> 1. Use toilet paper to wipe any loose debris from edge of bowl and behind seat hinges, drop into bowl and flush. 2. Take toilet brush and force water out of toilet bowl by pushing water through U bend. (this reduces dilution and increases effectiveness of cleaner). 3. Take Toilet cleaner and using directional flip top spray solution under rim. 4. Use toilet brush to spread toilet cleaner on all internal surfaces. 5. Apply toilet cleaner to red cloth and wipe down all external bowl surfaces, lid (inside and out) and seat (both sides). 6. OPTIONAL: leave toilet cleaner to work whilst cleaning other washroom areas 7. Use toilet brush to scrub underneath rim, inside of bowl and below water level. 8. Rinse red cloth and use to remove residual cleaner from external surfaces. dry seat with some toilet paper and dispose of in toilet. 9. Flush.
Health & Safety issues	<ol style="list-style-type: none"> 1. product should not be diluted, PPE must be worn. 2. First Aid instructions are found on the side of the container or in the Manager's office. 3. Bleach should not be used, it will reduce the quality of the porcelain allowing limescale to adhere.
